Muricidae

serie 1 - dimensioni reali

*Simple Guide
to the Mediterranean Sea Molluscs*

versione 2.0

pagina 1

Questo lavoro è parte del Progetto Internazionale per l'Insegnamento della Malacologia ed è dedicato ad attività educative. Quindi non è per profitto e non può essere venduto o usato per fini commerciali.

Le immagini sono usate esclusivamente per finalità educative all'interno del progetto e hanno requisiti scientifici, educativi e non per profitto. I disegni sono state realizzati da sui modelli dell'archivio del Progetto

Questa prima edizione sarà sicuramente oggetto di revisioni effettuate, nel tempo, sulla base di collaborazioni con gli altri paesi partecipanti.

Hexaplex trunculus
(Linnaeus, 1758)

Indothais lacera
(Born, 1778)

Indothais sacellum
(Gmelin, 1791)

Ocenebra erinaceus
(Linnaeus, 1758)

Babelomurex benoiti
(Tiberi, 1855)

Babelomurex cariniferus
(G. B. Sowerby I, 1834)

Babelomurex sentix
(Bayer, 1971)

La prima parte delle immagini possono essere stampate con varie tecnologie in base alle proposte che vi faremo nel tempo. La Più efficiente riteniamo sia quella detta “Minolta” con fogli a microcapsule termiche.

La seconda parte contiene le stesse immagini capovolte in senso orizzontale e intestate “CONTRARIO”. Questa torneranno utili per le varie tecniche di “incisione” o “punzonatura” che creano il rilievo sul lato opposto del foglio e quindi “invertito”.
